What is MobiRent

MobiRent is a robust Rental Management System for complete management of your rental business. It manages the full cycle of rental operation, right from customer enquiry to quotation, delivery, inventory tracking and receivables. The heart of MobiRent solution is web-based cloud-hosted server software that provides centralized management of rental operations.

Plus, there is a MobiRent mobile app for use by your field technician in charge of delivery and support function. The app allows proper inventory control, on-time delivery and accurate billing.

How it works

Feature Highlights

Integrated Call Center Functionality allows efficient CRM and boost customer satisfaction

GPRS/3G based data sync to server for real-time update and online transaction management

Automated rental order creation and BOM sent electronically for correct and timely dispatch

Complaint handling thru portal and field service and repair management using MobiRent app

MobiRent app runs on POS & Mobiles for managing field installation and on-spot Challan print

Automated invoicing to customers and account receivables tracking

Strict inventory control, online tracking of asset and workflow-based stock reconciliation

Strict inventory control, online tracking of asset and workflow-based stock reconciliation
